

On EVERY Production Front

In the fields and war factories controlled by the Axis, thousands of unwilling workers from conquered countries are forced to toil long hours. America does not have, nor want, such resources for war production...this nation's unparalleled resources of electric power alone more than offset Axis slave-power. In Southern California, Edison electricity is working on every production front... is a vital necessity in the building of ships, planes, guns and tanks, and in farm production.
